Speak fluently with proper pronunciation, intonation and pause, using appropriate grammar.
c) SEA (Reading) (Roll Number Wise)				Read fluently with proper pronunciation, intonation and pause.

Month (Nov 2024)	Unit / Content	Expected Learning Outcomes	Activities / Class Assignments / Home Assignments	Values / Skills
(Beehive)	A House is Not a Home	➤ Understand and appreciate prose as literary form. ➤ Realize the lessons and experiences that bitter experiences give.	Activities - Skimming and Scanning the Reading Text, Language Analysis (Vocabulary), Communicative Tasks (Speaking) Class Assignment – Answer competency – based questions in 30 – 40 words. Home Assignment – Answer value-based / competency-based questions in 80 – 100 words. / Worksheet	1. Feel sensitive towards the feelings of an individual. 2. Single mother's role.
(Moments)	The Beggar	➤ Understand that acceptance of mistakes will make life easier in contrast to hiding the truth and paying for it later/or ruining your inner peace.	Activities - Skimming and Scanning the Reading Text, Language Analysis (Vocabulary), Communicative Tasks (Speaking) Class Assignment – Answer competency – based questions in 30 – 40 words. Home Assignment – Answer value-based / competency-based questions in 80 – 100 words. / Worksheet	Realization of hard work and empathy.

Writing Skill	Diary Entry	➤ Understand the format, content, and expression in diary writing. ➤ Use personal experiences, emotions, and feelings for effective writing.	<u>Activities</u> – Know the format, content, and expression in diary entry with examples. <u>Class Assignment</u> – Discussion and written notes with examples. <u>Home Assignment</u> – Complete the discussed diary entry at home. / Worksheet	Choose the significant details to be written in a diary.
Grammar	(Revision) Reported speech - Determiners	➤ Use reporting verbs with the infinitive to make determiners ➤ Understand how to identify determiners.	<u>Activities</u> – Recap the determiners the form of each with examples. <u>Class Assignment</u> - Complete exercises as per the board pattern. <u>Home Assignment</u> – Complete exercises as per the board pattern. / Worksheet 40	Explore the functions of determiners.

Month (Dec 2024)	Unit / Content	Expected Learning Outcomes	Activities / Class Assignments / Home Assignments	Values / Skills
(Beehive)	Reach for The Top	➤ Understand and appreciate prose as literary form. ➤ Success is the culmination of hard work and sincerity	Activities - Skimming and Scanning the Reading Text, Language Analysis (Vocabulary), Communicative Tasks (Speaking) Class Assignment – Answer competency – based questions in 30 – 40 words. Home Assignment – Answer value-based / competency-based questions in 80 – 100 words. / Worksheet	Persistent endeavors to reach the top. To make them realize their responsibilities to safeguard environment.
Writing Skill	Diary Entry	➤ Understand the format, content, and expression in diary writing. ➤ Use personal experiences, emotions, and feelings for effective writing.	Activities – Recap of the format, content and expression in diary writing with examples. Class Assignment – Discussion and written notes with examples. Home Assignment – Complete the discussed formal letter writing at home. / Worksheet	Choose the significant details that should be included in diary writing.
Grammar	(Revision) Reported speech - Determiners	➤ Use reporting verbs with the infinitive to make determiners ➤ Understand how to identify determiners.	Activities – Recap the determiners the form of each with examples. Class Assignment - Complete exercises as per the board pattern. Home Assignment – Complete exercises as per the board pattern. / Worksheet	Explore the functions of determiners.

(Jan / Feb 2025)		Outcomes	Assignments	
(Beehive)	On Killing a Tree (Poetry)	➤ Understand and appreciate poetry as literary form. ➤ Sensitize the students to the fact that the killing of a tree leads to our own destruction.	Activities - Skimming and Scanning the Reading Text, Language Analysis (Vocabulary), Communicative Tasks (Speaking) Class Assignment – Answer competency – based questions in 30 – 40 words. Home Assignment – Answer value-based / competency-based questions in 80 – 100 words. /Worksheet	Understand the sarcasm used by the poet when he describes the ruthlessness of human beings when they cut down trees.
(Beehive)	Kathmandu	➤ To make a diary entry as a Travelogue. ➤ To know the culture and religion of Hindus and Buddhism.	Activities - Skimming and Scanning the Reading Text, Language Analysis (Vocabulary), Communicative Tasks (Speaking) Class Assignment – Answer competency–based questions in 30 – 40 words. Home Assignment – Answer value-based / competency-based questions in 80 – 100 words. /Worksheet	Respect the culture of other countries
(Beehive)	If I Were You (Drama)	➤ To enable the learner to understand some examples of wit and irony.	Activities - Skimming and Scanning the Reading Text, Language Analysis (Vocabulary), Communicative Tasks (Speaking) Class Assignment – Answer competency–based questions in 30 – 40 words. Home Assignment – Answer value-based / competency-based questions in 80 – 100 words. /Worksheet	Someone like the intruder in the play might misuse your unique and personal identity details. This is called identity theft.

Writing Skill	Letter to the Editor	➤ Understand the format, content, and expression in formal letter writing. ➤ Use formal language for effective writing.	Activities – Introduce the format, content and expression in formal letter writing with examples. Class Assignment – Discussion and written notes with examples. Home Assignment – Complete the discussed formal letter writing at home. / Worksheet	Choose the significant details that should be included in formal letterwriting.
Grammar	(Revision) Reported speech - Determiners	➤ Use reporting verbs with the infinitive to make determiners ➤ Understand how to identify determiners.	Activities – Recap the determiners the form of each with examples. Class Assignment - Complete exercises as per the board pattern. Home Assignment – Complete exercises as per the board pattern. / Worksheet	Explore the functions of determiners.

Syllabus for Maths - Std 9 (April to March)

Std IX – (9) - MATHS

Month	Unit/ Content	Expected Learning Outcome	Activities/ Class Assignments/ Home assignments
April	Co-ordinate Geometry (Ls. No. 3)	Students will be able to – Determine the X and Y co-ordinate of a point from the graph and write the co-ordinates of the point as an ordered pair. Plot a point on the Cartesian plane and determine the QUADRANT of the point. Apply the concepts of co-ordinate geometry.	Exercise based on co-ordinate Geometry. Maths lab activity 1
	Linear equations in two variables (Ls. No. 4)	Students will be able to - Recall the concepts of coefficients and variables and construct a linear equation from a given statement. Compare the linear equation to the standard form $ax + by + c = 0$ and find out the value of a, b and c. Plot the points on the graph and represent a linear equation in two variables. Find the coordinates for the equation and represent it on the number line and a cartesian plane.	Home assignment – Exercises from textbook + worksheet based on lesson. Activity – Plot two linear equations on the graph and find out the area of the triangle enclosed by the lines
June	Number System (Ls no. 1)	Students will be able to Recall natural numbers, whole numbers, integers and Rational numbers. Recall the concepts of rational numbers and revise them. Modify a given non-terminating decimal number in the form of p/q and decide whether it is an irrational number. Use Pythagoras theorem to create a Pythagorean triplet and construct the length equivalent to root of a given number.	Activity – 7 Drawing a colourful spiral for root 15 Home assignment – Exercises from textbook + worksheet based on lesson. Youtube Link - https://www.youtube.com/watch?v=dskSXz35LRw

		Deduce the value of a given fraction in its decimal form and infer if the decimal number is terminating or non-terminating. Use successive magnification and represent a given decimal number on a number line. Use different properties for irrational numbers to determine whether the sum, difference, quotient and products are irrational or not. Use laws of exponents for real numbers to simplify a given expression	
June / July	Polynomials (Ls. No.2)	Students will be able to – Differentiate between zero, linear, quadratic and cubic polynomials. Understand concept of substituting values of x in the polynomial $p(x)$ and identify if the given value is zero of the polynomials. Understand and apply remainder theorem to calculate division of $p(x)$ by linear polynomial '$x - a$' and find the remainder. Apply the factor theorem and determine if a linear polynomial '$x-a$' is a factor of the given polynomial $p(x)$. Factorise the polynomials by splitting middle term method. Understand the algebraic identities and factorize the given polynomial using identities.	Home assignment – Exercises from textbook + worksheet based on lesson+ Revision sums
August	Lines and Angles (Ls. No.6)	Students will be able to - Recall all the concepts covered in the previous classes. Recall concept of parallel lines and angles created by transversal cutting parallel lines. Apply the concepts of angles in each figure to solve for missing values.	Home assignment – Exercises from textbook + worksheet based on lesson. Youtube link - https://www.youtube.com/watch?v=c0RWBk6wonk

		Define the relationship between the angles created by transversal on parallel lines. Check whether the given lines are parallel or not. Prove the angle sum property and exterior angle property for a triangle.	
September	Triangles (Ls. No. 7)	Students will be able to - Recall the concepts of congruency of triangles. Apply the concepts of angles to prove congruence between two triangles in a given figure. Revise the various tests of congruency of triangles and prove relationship between given angles, sides and triangles. Apply the criteria for the congruency of the triangles to prove that the angles opposite to equal sides are equal. Use the property to solve the given examples. Use properties of inequalities in triangles to prove the relationship between any given sides or angles in each figure.	Activity – Using cut outs of triangles to prove various tests of congruency. Home assignment – Exercises from textbook + worksheet based on lesson. Youtube Link - https://www.youtube.com/watch?v=VA6XGfiqfSw
	REVISION	REVISION for Half yearly Exam	REVISION
		TERM II	
October	Heron's Formula (Ls. No.10)	Students will be able to Calculate the area of a given triangle to state the limitation of the standard formula Apply Heron's formula to calculate the area of triangle. Breakdown a given polygon into triangles and find the area of a given polygon as a sum of areas of those triangles.	Home assignment – Exercises from textbook + worksheet based on lesson. Youtube Link – https://www.youtube.com/watch?v=-6iQhDBXotA

	Quadrilateral (Ls. No. 8)	Students will be able to - Apply angle sum property of quadrilateral and find the value of unknown angle. List the properties of quadrilaterals and classify real life objects into different types of quadrilaterals. List the properties of a parallelogram and apply them to find unknown angle and unknown side. Prove the midpoint theorem of triangles using concepts of congruency and transversal angles and extend the application to quadrilaterals.	Home assignment – Exercises from textbook + worksheet based on lesson. Youtube Link – https://www.youtube.com/watch?v=exnFVDNBf94
November	Circles (Ls. No. – 9)	Students will be able to Construct a circle of a given radius and verify that the length of multiple segments drawn from the centre of the circle to the circumference are equal. Recall all the parts of the circle. Apply theorems regarding angle subtended by a chord in a circle and find the measure of an angle in the given figure. Apply the property of perpendicular from the centre to the chord and find the missing values in the given figure. Construct the circle passing through 3 non-collinear points. Apply the theorems based on circle to solve the examples. Apply the relationship between angles of a cyclic quadrilateral and solve the given examples.	Activity – Explain various parts of the circle using cutouts. Home assignment – Exercises from textbook + worksheet based on lesson.

December	Surface Areas and Volumes (Ls. No. 11)	Students will be able to Calculate lateral surface area and total surface area for cube and cuboid. Calculate curved surface area and total surface area of cylinder. and right circular cone. Calculate surface area of a sphere and hemisphere. Calculate the volume of cube, cuboid, cylinder, cone, sphere and hemisphere.	Home assignment – Exercises from textbook + worksheet based on lesson. Activity – Draw a Rangoli using geometrical shapes only.
January	Statistics (Ls. No.12)	Students will be able to Record and label a given data set and create a frequency table. Read the given data and create a frequency table using tally marks. Recall the concepts of mean, median and mode with examples. Find out mean, median and mode for ungrouped data.	Home assignment – Exercises from textbook + worksheet based on lesson.
February	Introduction to Euclid's Geometry (Ls. No. 5)	Give examples of theorems, postulates and axioms and differentiate between them with examples. Reproduce Euclid's axioms in your own words and give examples for each List Euclid's five postulates and visualize and illustrate them through a diagram Analyze given statements /postulates and determine if they are extensions of Euclid's postulates Apply Euclid's postulates and prove basic geometrical concepts about lines, points, planes, shapes, etc.	Home assignment – Exercises from textbook + worksheet based on lesson.
	REVISION	REVISION for Annual Exam	REVISION

Std IX Science Syllabus 2024-25

Month	Unit/ Content	Expected Learning Outcome	Activities/ Class Assignments/ Homeassignments	Value Skills
April	L1: MATTER IN OUR SURROUNDING (CHEMISTRY)	-To know about the physical nature of matter. - To understand the characteristics of particles of matter and states of matter. -To understand how matter changes its state.	Activity – 1. To show that just a few crystals of potassium permanganate can colour a large volume of water. 2. To study particles of matter have space between them. https://www.youtube.com/watch?v=XFL6sxDehgw	-To create awareness of the surroundings.
June	L.2: IS MATTER AROUND US PURE (CHEMISTRY)	-To know about mixture and solution. -To understand physical and chemical changes. -To know about types of pure substances.	Activity – 1. To study the Tyndall effect using a solution of copper sulphate and a mixture of water and milk. https://www.youtube.com/watch?v=1c1XzqtAJrk	-To develop skills like observation and experimentation.

June	L.5: THE FUNDAMENTAL UNIT OF LIFE (BIOLOGY)	-To know about what are living organisms made up of? -To understand what is a cell made up of? -To understand what is the structural organization of a cell?	Activity – 1. Measure the consequences of swelling of different substances due to differences in concentration like swelling of gram or kidney beans in the kitchen. 2. If a substance is boiled and then kept in a different concentrated solution it will not show any difference as cells are dead example boil potato does not show any change in tonicity. 3. Analyse the concept that hypertonic solution is responsible for the shrinkage of fingers when we wash clothes for longer time. Note down all your observations in your notebook. https://www.youtube.com/watch?v=x_cVxG6DNiM	To develop skills like observation, experimentation, and inculcating values like division of labour, teamwork, leadership, and obedience.
July	L.7: MOTION (PHYSICS)	-To understand describing motion.	Activity – 1. Have you ever experienced that the train in which you are sitting appears to move while it is at rest?	

		-To know about measuring the rate of motion. -To understand the rate of change of Velocity. -To understand uniform circular motion.	Discuss and share your experience with your friends and teacher. Note down in your notebook. 2. Take a metre scale and a long rope. Walk from one corner of your room to the opposite corner along its sides. Measure the distance covered by you and the magnitude of the displacement. What difference would you notice between the two in this case? https://www.youtube.com/watch?v=cFZbMRtp4Xs	To develop skills like observation and experimentation .
July /August	L.8: FORCE AND LAWS OF MOTION (PHYSICS)	- To learn balanced and unbalanced forces. -To understand the first law of motion. -To know about inertia and mass. -To understand the second law of motion. -To understand the third law of motion.	Activity – 1. Make a pile similar to Fig. 8.6 pg.no. 90 with Carom coins on a table. Attempt a sharp horizontal hit at the bottom of the pile using another carom coin or the striker. If the hit is strong enough, the bottom coin moves out quickly. Once the lowest coin is removed, the inertia of the other coins makes them ‘fall’ vertically on the table. Note down your observation in your notebook. 2. Set a five-rupee coin on a stiff card covering an empty glass tumbler	To develop skills like observation and experimentation .

			standing on a table (see Fig. 8.7) pg.no.91. • Give the card a sharp horizontal flick with a finger. If it is done fast then the card shoots away, allowing the coin to fall vertically into the glass tumbler due to its inertia. • The inertia of the coin tries to maintain its state of rest even when the card flies off. Note down your observation in your notebook. 3. Place a water-filled tumbler on a tray. Hold the tray and turn around as fast as you can. We observe that the water spills. Why? Note down your observation in your notebook. • https://www.youtube.com/watch?v=kUvtYr1PKIg

August	L.11. SOUND (PHYSICS)	-To know about the production of sound. -To understand propagation of sound. -To know about the reflection of sound. -To know about the application of ultrasound.	Activity – 1. Make a list of different types of musical instruments and note down which part of the instrument vibrates to produce sound. 2. Analyse the concept of echo i.e. megaphone, stethoscope, etc. Identify types of waves in different situation. Note down all your observations in your notebook. https://www.youtube.com/watch?v=hWkxTtIOsYw	-To develop skills like observation, experimentation
September	REVISION	HALF-YEARLY		
October	L.6: TISSUES (BIOLOGY)	-To know whether plants and animals are made of same types of tissues. -To Know about different types of plant tissues. -To know about different types of animal tissues.	Activity – 1. To identify that obesity is due to adipose tissue which stores fat in our body. Draw the diagram in your notebook. 2. Due to wrong postures while sitting, lying or watching TV affects different tissues present in the body. Identify them and draw their diagram in your notebook. 3. Share your opinion about the	To develop skills like observation, diagrammatical representation, and inculcating values like Creativity, Awareness, Responsibility, Coordination, Division of labour.

			occurrence of sprain due to overstretched of ligaments, fatigue is due to accumulation of lactic acid in muscles. Note down in your notebook. https://www.youtube.com/watch?v=TWTvQBO2qDc

November	L.3: ATOMS AND MOLECULES (CHEMISTRY)	-To understand the laws of chemical combination. -To understand what is an atom and a molecule. -To know how to write chemical formulae. -To understand molecular mass.	Activity - 1. Apply the concept of stoichiometry in their day-to-day life. 2. To make the formulae of chemical compounds by criss-cross method. https://www.youtube.com/watch?v=cGAlfRzxH-A	-To develop skills like observation, experimentation
November /December	L.4: STRUCTURE OF THE ATOM (CHEMISTRY)	-To know about charged particles in matter. -To understand the structure of an atom. -To learn about how are electrons distributed in different orbits (shells)? -To know about Valency. -To understand atomic number and mass number, isotopes.	Activity – 1. To make the static models displaying electronic configurations of the first eighteen elements. 2. Write your views about The the problem of energy can be solved by using nuclear fuels. 3. The age of the fossil can be determined by calculating the % of the C-14 isotope in the fossil. How? Note down all your observations in your notebook. https://www.youtube.com/watch?v=x b0jzqssVx4	To develop skills like observation, experimentation

January	L.9 : GRAVITATION (PHYSICS)	-To know about gravitation. -To know about free fall. -To learn about mass and weight. -To learn thrust and pressure. -To understand Archimedes' Principle.	Activity – 1. Gravitational force acts on all objects in proportion to their masses. Why then, a heavy object does not fall faster than a light object? 2. To analyse and conclude the situation for applying pressure or thrust for example why is it difficult to hold a school bag having a strap made of a thin and strong string? 3. Take an empty plastic bottle. Close the mouth of the bottle with an airtight stopper. Put it in a bucket filled with water. You will	To develop skills like observation and experimentation.

			see that the bottle floats. Push the bottle into the water. You will feel an upward push. Try to push it further down. You will find it difficult to push deeper and deeper. This indicates that water exerts a force on the bottle in the upward direction. The upward force exerted by the water goes on increasing as the bottle is pushed deeper till it is completely immersed. Now, release the bottle. It bounces back to the surface. Does the force due to the gravitational attraction of the earth act on this bottle? If so, why doesn't the bottle stay immersed in water after it is released? How can you immerse the bottle in water? Note down your observation in your notebook. https://www.youtube.com/watch?v=Xj3mG_wJFJnE

January/ February	L.10: WORK AND ENERGY (PHYSICS)	-To understand work and scientific conception of work. -To understand energy and types of energy. -To know the rate of doing work.	Activity – 1. Apply the concept of work in daily actions like a person carrying a load on his head. 2. Many of the human activities and the gadgets we use involve the conversion of energy from one form to another. Make a list of such activities and gadgets. Identify in each activity/gadget the kind of energy conversion that takes place. 3. Think of situations when the object is not displaced despite a force acting on it. Also, think of situations when an object gets displaced in the absence of a force acting on it. List all the situations that you can think of for each one. Note down all your observations for all the activities in your notebook. https://www.youtube.com/watch?v=kS-wQsUSHsY	To develop skills like observation, experimentation

February	L.12: IMPROVEMENT IN FOOD RESOURCES (BIOLOGY)	-To learn how to improve crop yields. -To learn crop production management, cropping patterns, crop protection, and storage of grains. -To understand animal husbandry -To learn about cattle farming, poultry farming, fish production, and bee-keeping.	Activity – News analysis: Search news on the latest innovations in agricultural practices and crop production and analyse it according to understanding. Note down all your observations in your notebook. https://www.youtube.com/watch?v=NmSvXovi3Xw PART 1 https://www.youtube.com/watch?v=w34gwDhpQ74 PART 2	-To inculcate values like Awareness, Responsibility, and Concern for others.
